

Sawyer Saddle Machine

Model SSM

OVERVIEW

Introducing the latest in beveling equipment, the Sawyer Saddle Machine.

Four saddle machines to cut and bevel pipe ranging from 1.5” to 20”. Familiar open frame design and Spacer system for easy operator training. One Spacer accommodates three pipe sizes for simple operation and ease of use. This machine can be mounted anywhere on the pipe and easily secured with a locking boomer. The design you know with the smooth travel and clean cut you expect from Sawyer beveling machines.
