

Double Chain Clamp

Model 261

OVERVIEW

The Double Chain Clamp is designed for the aligning and reforming of pipes and vessels up to 20" in diameter, up to Schedule 80. If no reforming is required, the clamps can be used to align pipes over Schedule 80. Specialized heavy duty jackbars and main block handle even the most difficult of reforming applications.

Clamps sold in international markets are color coded for quick recognition of steel and stainless steel applications.
