

Quick Action Flange Alignment Pins

Model 491

OVERVIEW

Sawyer Mfg.'s Quick Action Flange Alignment Pins provide a fast, dependable solution for aligning flange bolt holes during pipe fit-up and welding. The push-button release allows the pins to install and remove instantly, while the precision-tapered design automatically centers holes from 5/8" to 1-5/8".

FEATURES AND BENEFITS

- Installs and removes instantly with push button release
- Precision tapered pin design automatically centers on 5/8" to 1-5/8" bolt holes
- Rugged ACME threads deliver outstanding clamping power and smooth, controlled adjustment
- Hardened steel provides exceptional strength and wear resistance
- Each set of pins provides speed, safety, versatility, durability, and productivity
